

the EVASONS

BIOGRAPHY

During the early 19th century, a small number of married couples gained significant notoriety with performances called *Second Sight*. The Evasons are one of very few couples in history who have mastered this unusual talent. They continue to travel around the globe and carry on the rare and mysterious tradition.

The Evasons' network TV appearances include NBC, CBS, FOX, CW Network, Discovery Channel, and Netflix. They have entertained troops overseas and headlined cruise ships and casino showrooms. They have performed at the Comedy and Magic Club in Hermosa Beach, the Great American Comedy Festival at the Johnny Carson Theatre in Nebraska, and the world-famous Magic Castle in Hollywood. And they are the only mentalists in history to be featured performers at an NBA halftime show before a crowd of 18,000 people!

The Evasons have been honored with some of the top awards in their field. They are the first recipients of "The Mentalism Award" from the Milbourne Christopher Foundation. They were awarded the highest honor for distinguished professionalism by the Psychic Entertainers Association. They are the only mentalists ever to receive the "SARMOTI Award" which legendary magicians Siegfried & Roy present to their favorite act in Las Vegas. They have also been nominated for Stage Entertainers of the Year by the Academy of Magical Arts in Los Angeles.

When you see the Evasons, you'll understand why on Penn & Teller's international primetime TV show Fool Us, Penn & Teller said: "*The kind of mental gymnastics that are done on this are unbelievable. This is one of those rare acts where the more you know about it, the more amazing it is. This act is so good - we've never seen better!*"

Still feeling a little skeptical? Remember, there are no plants, stooges, hidden wires or secret electronic communication devices. In fact, they will give \$100,000 to anyone who can prove otherwise!

The Evasons love inspiring people to open their minds to new possibilities. "We're not trying to change beliefs," Jeff and Tessa explain, "only to spark imagination and tickle the sense of wonder!"
